FIBER OPTIC CONNECTOR CLEANERS

Today’s optical networking components requiring minimal insertion loss and back reflections demand, quick reliable cleaning solutions. Fiber tips containing even trace amounts of debris not only suffer from power degradation but also an increased likelihood of permanent damage when mated.

Product variations include a variety of solutions that make it easy to use on most fiber connector types, and in any fiber or lens cleaning situation. The cost and performance of these cleaning tools make it an easy choice over competitive solutions.

Features

- Minimizes static attraction
- Ultra clean micro-fiber cloth captures debris and other contamination
- The cloth is robust, it does not fray or leave any fibrous materials behind
- The most cost effective high-end cleaning solution available

SINGLE FIBER CLEANERS

The NEOCLEAN E is a dry cloth cleaning tool specifically designed to clean single fiber connectors residing in an adapter, faceplate or bulkhead. The dust cap of the cleaning tool acts as an adapter for cleaning unmated connectors.

The NEOCLEAN E is refillable and simple to use. It is effective at removing oil and dust contamination that can negatively impact optical performance.

Features

- Easy pushing motion to engage tool
- Tool offers 700 cleanings
- Refillable option lowers cost per clean
- Cleaning micro fibers are densely stranded and debris free
- Dust cap lid opens to clean unmated connectors
- The cleaning tip has single 360° rotation motion
- Lanyard prevents the dust cap from getting lost
- RoHS Compliant

Applications

- Fiber network panels and assemblies
- Outdoor FTTX applications using SC, FC, LC or MU connectors
- Cable assembly production facility
- Testing laboratories
- Data centers
- Central office

SINGLE FIBER CLEANERS

NEOCLEAN E1 for 1.25mm

Cleans 1.25mm LC and MU connectors
Cleans connectors in the bulkhead adapter and on a cable assembly
Uses refill 12838

NEOCLEAN E3 for 2.5mm

Cleans 2.5mm SC, ST, FC and E2000 connectors
Cleans connectors in the bulkhead adapter and on a cable assembly
Uses refill 14623

14623	ATC-NE-ES3	NEOCLEAN E3 2.5mm Refill Pack

SINGLE FIBER CLEANERS

The US Conec IBC™ Brand Cleaners are mechanical cleaning tools designed to clean connectors residing in an adapter or faceplate and unmated connectors. The IBC™ Brand Cleaning tools use a novel dry cleaning strand to gently sweep and lift away dust and residues from the connector end face.

The IBC™ Brand Cleaners are effective at removing the following contaminants:

Arizona Road Dust (ISO 12103-1)	Skin Oil Residue	Salt Water Residue
Alcohol Residue	Vegetable Residue	Hand Lotion
Distilled Water Residue	Graphite	T-shirt Lint

Features

- Simple pushing motion to engage tool
- Audible CLICK to alert the operator when tools is fully engaged
- Over 525+ engagements per unit
- Cleans connectors loaded in a bulkhead adapter and on unmated cable assemblies
- Dry cleaning strand eliminates the need for solvents to be effective
- Crush resistant to over 250N
- Impact resistant to survive drops over 1.5M

Applications

- Telecom Central Offices
- Data Centers
- Cable Television Head End
- Outside Plant and Fiber To The Home
- Fiber to The Antenna for WiMax and Cellular Networks
- Fiber Optic Broadcasting including HDTV
- Fiber Optic Military and Civilian Aviation
- Military and Civilian Maritime Optical Networks
- Fiber Optic Satellite Communication Systems

SINGLE FIBER CLEANERS

IBC™ Brand Cleaning Tools for 2.5mm Connectors

IBC™ Brand Cleaner SC

Cleans SC, ST, FC and E2000 connectors with PC and APC polishes

IBC™ Brand Cleaner HC

Cleans OptiTap® connectors in FTTx applications

IBC™ Brand Cleaner M250

Cleans SC, ST, FC, E2000 and OptiTap® connectors with PC and APC polishes
Cleans harsh environment 2.5mm based connector systems - TFOCA
Cleans plug and socket termini
1.8mm cleaning region

IBC™ Brand Cleaner Zi25

Cleans SC, ST, FC, E2000 and OptiTap® connectors with PC and APC polishes
Reduced housing – 109mm (4.3 ±)
Cleans harsh environment 2.5mm based connector systems - TFOCA
Compact size
Includes Retractable Zipcord

SINGLE FIBER CLEANERS

IBC™ Brand Cleaning Tools for 1.25mm Connectors

IBC™ Brand Cleaner LC

Cleans LC and MU connectors with PC and APC polishes

IBC™ Brand Cleaner H125

Cleans LC and MU connectors with PC and APC polishes
Cleans harsh environment 1.25mm based connector systems – ARINC 800, ODC series, MXL38999, LuxCis series, MIL PRF 64266 (NGCON), Neutrik opticalCON
Features a flexible cleaning tip that up to 30° bend without damage
Cleans plug and socket termini

IBC™ Brand Cleaner Zi125

Cleans LC and MU connectors with PC and APC polishes
Reduced housing – 110mm [4.3"±]
Compact size
Includes Retractable Zipcord

IBC™ Brand Cleaner LC²

Cleans LC duplex connectors with PC and APC polishes
1050+ cleaning per unit
Cleans duplex LC connectors loaded in a bulkhead adapter and on unmated cable assemblies

SINGLE FIBER CLEANERS

IBC™ Brand Cleaning Tools for Specialty Connectors

IBC™ Brand Cleaner M20

Cleans harsh environment 2.0mm based connector systems – SMPTE 304M and SMPTE 358M and MIL PRF 28876
Cleans plug and socket termini

IBC™ Brand Cleaner M16

Cleans harsh environment 1.6mm based connector systems M38999
Cleans plug and socket termini

IBC™ Brand Cleaner ZiA125

Cleans MIL/AERO 1.25mm connectors
Compact size
Includes Retractable Zipcord

IBC™ Brand Cleaner GA16

Cleans harsh environment 1.6mm based connector systems-M38999
Reduced housing-109mm (4.3")
Cleans plug and socket termini
Cleans through Glenair M38999 test adapters
Includes Wrist Lanyard

IBC™ Brand Cleaner G1000

Cleans Glenair Mighty Mouse 20 series and other MIL/AERO 1.0mm connectors
Includes Retractable Zipcord

MULTIFIBER CLEANERS

The US Conec IBC™ Brand Cleaners MT series mechanical cleaning tools are designed for cleaning the fiber arrays on MT based connector systems. These tools are capable of cleaning MT based connector systems loaded in a bulkhead adapter, on the card edge, the backplane and on unmated cable assemblies. The IBC™ Brand Cleaners will clean both female (no guide pin) and male (with steel guide pins). These tools will clean both flat polished multimode and 8° angled singlemode MT ferrules.

There are some MT based connector systems that require the use of an adapter to align the IBC™ Brand Cleaning tools. The adapters are listed below. Please contact US Conec if you have any questions or would like confirmation to verify which tool you need. We are here to help you.

Features

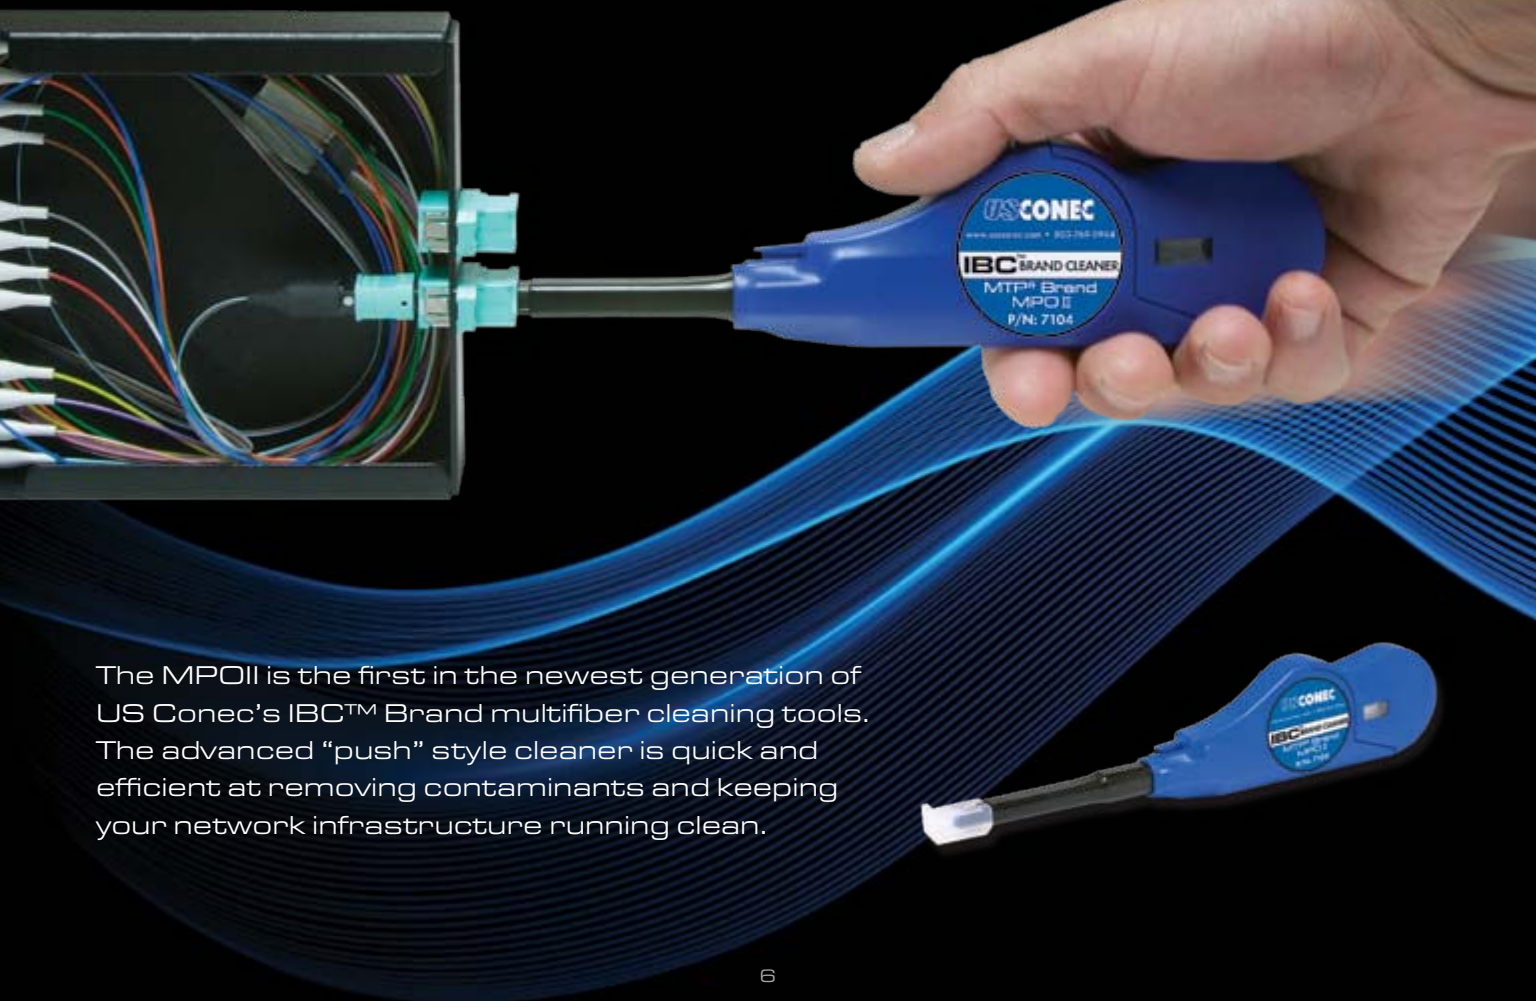

- Cleans male and female MT ferrule
- 525+ cleaning per unit
- Simple push style or dial turn engagement
- Nozzle is keyed for precise alignment of the cleaning tip to the fiber array
- Alignment cap lid opens for cleaning the unmated connectors
- Cleans connectors loaded in a bulkhead adapter and on unmated cable assemblies
- Cleans male (with guide pins) and female MT ferrules
- RoHS compliant

Applications

- Telecom central offices
- Data Centers
- Cable Television Head End
- Outside Plant and FTTH
- MPO Cassette Modules
- Parallel Optics Transceivers

MULTIFIBER CLEANERS

A **PUSH** in the right direction...

The MPOII is the first in the newest generation of US Conec's IBC™ Brand multifiber cleaning tools. The advanced "push" style cleaner is quick and efficient at removing contaminants and keeping your network infrastructure running clean.

MULTIFIBER CLEANERS

IBC™ Brand MT Series Cleaning Tools

IBC™ Brand Cleaner MPO II

Cleans MTP® and generic MPO connectors

Cleans multimode (flat) and singlemode (8° angled) MT ferrules

IBC™ Brand Cleaner MT38 II

Cleans MT based D38999 and other hardened connectors - requires adapters

IBC™ Brand Cleaner OptiTip® II

Cleans OptiTip-style connectors

IBC™ Brand Cleaner HBMT

Cleans multimode MTP® and generic MPO connectors

Cleans Molex HBMT™, 1x8 ARRAY, 1X6 ARRAY, 1X3 Circular MT, and multimode MPO connectors

IBC™ Brand Cleaner HBMT EN (Extended Nozzle)

Cleans multimode MTP® and generic MPO connectors

Cleans Molex HBMT™, 1x8 ARRAY, 1X6 ARRAY, 1X3 Circular MT, and multimode MPO connectors in recessed chassis

Nozzle length is 224mm

MULTIFIBER CLEANERS

The NEOCLEAN-M is designed for cleaning MPO and MTP[®] optical connector ferrule end face with a simple push action. The one push system automatically cleans the connector and advances the cleaning tape with a simple one hand operation. With a compact and ergonomic design, the 2-in-1 plug and port cleaner offers quick and effective removal of contaminants and debris.

Features

- 600+ cleanings per unit
- Cleans MTP[®] and generic MPO connectors
- Alignment cap lid opens for cleaning the unmated cable assemblies
- Cleans male (with guide pins) and female MT ferrules
- Cleans multimode (flat) and singlemode (8° angled) MT ferrules

Applications

- Telecom Central Offices
- Data Centers
- Outside Plant and Fiber To The Home
- MPO Cassette Modules

MULTIFIBER CLEANERS

NEOCLEAN-M

- Cleans male (with guide pins) and female MT ferrules
- Cleans multimode (flat) and singlemode (8° angled) MT ferrules
- Simple one-push system
- Compact with plug attachment
- 2-in-1 port and plug cleaning

REFILLABLE CASSETTE CLEANERS

The OPTIPOP R is a cassette style fiber optic connector cleaner system that can be refilled for reducing cleaning costs. It uses a densely woven micro-fiber cleaning fabric to remove harmful contaminants off of the ferrule end face. The OPTIPOP R cassette cleaning tool will accommodate all single fiber connections. US Conec has versions of the OPTIPOP R cassette cleaning tools that are designed specially for cleaning multi-fiber connector systems including the MTP® Brand Connectors, standard MPO and MTRJ connectors for both singlemode and multimode connectors. The customized OPTIPOP R cassette cleaning tool will accommodate the alignment guide pins on male MT ferrules. US Conec has a version of the OPTIPOP R cassette cleaning tool that is ideal for field use at FTTX work sites. This version accommodates the OptiTap™ connector housing making it ideal for technicians that need to clean OptiTap™ plug connectors on drop cables.

The anti-static cloth material produces a pristine fiber tip and minimizes contaminant attraction. The cleaning fabric is pre-washed and produces less than 70 pcs/CFM of particles > 1 mm in size, making this system excellent for use in any production environment including clean rooms.

Features

- Replacement reels are easy to install and reduce the cost per cleaning
- 400+ Cleanings
- Eliminates electrostatic charge
- The washed, ultra clean micro-fiber cloth captures debris and other contamination
- The cloth is robust, it does not fray or leave any fibrous materials behind
- The most cost effective high-end cleaning solution available

Applications

- FTTX work sites installing OptiTap™ drop cables
- Data center installation and preventative maintenance
- Central office and head end new equipment installations and preventive maintenance
- Production facilities that terminate fiber optic cable assemblies
- Testing and measuring laboratories using optoelectronic equipment
- Any application that uses unmated fiber optic connectors

REFILLABLE CASSETTE CLEANERS

OPTIPOP R Refillable Cassette Cleaner

OPTIPOP R Cleaner - Single Slot

Cleans all single fiber (SC, ST, FC, E2000, LC, MU) and female MT connectors (MTP®, MPO, MTRJ)

OPTIPOP R Cleaner - Two Slots

Cleans LC and MU duplex connections

OPTIPOP R Cleaner - MPO Male

Cleans male MPO connectors with guide pins

OPTIPOP R Cleaner - MTRJ Male

Cleans male MTRJ connectors with guide pins

OPTIPOP R Cleaner - OptiTap®

Cleans OptiTap® hardened connectors

REFILLABLE CASSETTE CLEANERS

The NEOCLEAN PZ is a cassette style fiber optic cleaner system designed specifically for the PRIZM® LightTurn® connector. This refillable cassette cleaner uses a microfiber fabric to remove harmful contaminants off of the ferrule end face. The anti-static cleaning material used in the cassette produces a pristine optical window and minimizes contaminant attraction. The cleaning material is pre-washed making it excellent for use in any production environment, including clean rooms. The NEOCLEAN PZ cassette cleaning tool will accommodate both bare ribbon and jacketed PRIZM® LightTurn® cable assemblies.

Features

- Designed specifically for PRIZM® LightTurn® connector system
- Refillable, thereby reducing waste and decreasing cost per cleaning
- Replacement refills are simple to install, self-contained cartridges
- 500+ cleanings
- Eliminates electrostatic discharge
- Washed, ultra clean cloth captures debris and other contaminants
- Robust cloth, does not fray or leave any fibrous materials behind

Applications

- Bare PRIZM® LightTurn® ferrule
- Ribbon PRIZM® LightTurn® cable assemblies
- Jacketed PRIZM® LightTurn® cable assemblies

REFILLABLE CASSETTE CLEANERS

The CLETOP and CLETOP-S are cassette style fiber optic connector cleaner systems that can be refilled for reducing cleaning costs. They use densely woven micro-fiber cleaning fabrics to remove harmful contaminants off of the ferrule end face. The CLETOP and CLETOP-S cassette cleaning tools will accommodate all single fiber connections.

US Conec has versions of the CLETOP and CLETOP-S cassette cleaning tools that are designed specially for cleaning multi-fiber connector systems including the MTP® Brand Connectors, standard MPO and MTRJ connectors for both singlemode and multimode connectors. The customized CLETOP and CLETOP-S cassette cleaning tools will accommodate the alignment guide pins on male MT ferrules. US Conec has versions of the CLETOP and CLETOP-S cassette cleaning tools that are ideal for field use at FTTX work sites. These versions accommodate the OptiTap™ connector housing making it ideal for technicians that need to clean OptiTap™ plug connectors on drop cables.

The anti-static cloth material produces a pristine fiber tip and minimizes contaminant attraction. The cleaning fabric is pre-washed and produces less than 70 pcs/CFM of particles > 1 mm in size.

Features

- Replacement reels are easy to install and reduce the cost per cleaning

REFILLABLE CASSETTE CLEANERS

CLETOP Cassette Cleaners

CLETOP Type A Blue Tape

Cleans SC, SC2, FC, ST, DIN, D4, E2000

Uses refill 14709 or 14710

CLETOP Type B Blue Tape

Cleans LC, MU, MT, MPO, MTRJ (Female), BIC

Uses refill 14709 or 14710

CLETOP Type MTRJ White Tape

Cleans MTRJ (Male and Female)

Uses refill 14709 or 14710

CLETOP Type MPO/MTP® White Tape

Cleans MPO/MTP® (Male and Female)

Uses refill 14709 or 14710

CLETOP - S Cassette Cleaners

CLETOP - S Type A Blue Tape

Cleans SC, SC2, ST, FC, DIN, D4, E2000

Uses refill 14711 or 14712

CLETOP - S Type B Blue Tape

Cleans LC, MU, LC, MT, MPO, MTRJ (Female), BIC

Uses refill 14711 or 14712

STICK & PIPE CLEANERS

The NEOCLEAN S stick use a micro woven fabric for the cleaning medium that can be used for dry only or wet-dry cleaning. The NEOCLEAN S stick provides excellent cleaning performance and are notched for easy customization for limited access in bulkhead connection and optical modules. The NEOCLEAN S sticks are available for 2.5mm and 1.25 mm based connectors, transceiver interfaces, and NEOCLEAN S Stick Cleaners lenses.

The OPTIPOP P is a novel pipe cleaning tool designed to “cup” the ferrule on unmated connectors and for fiber optic pin termini in hardened connectors. The OPTIPOP P pipe cleaner covers the ferrule both the end face and sides. The pipes use the same micro woven fabric that used on the NEOCLEAN S sticks and OPTIPOP R cassettes making it ideal for dry only or wet-dry cleaning. The OPTIPOP P pipes are available for 2.5mm and 1.25mm ferrules making it an easy choice over competitive solutions.

The CLETOP stick cleaners use a micro woven fabric for the cleaning medium that can be used for dry only or wet-dry cleaning. The CLETOP stick cleaners provide excellent cleaning performance in bulkhead connection and optical modules. The CLETOP cleaning sticks are available for 1.25 mm, 2.0 mm and 2.5 mm based connectors, transceiver interfaces, and lenses.

Features

- Accommodates small form factor duplex, single fiber connectors, transceiver receptacles and lenses
- Suitable for factory or field use
- Notched for easy customization
- Works in hard to reach areas

Applications

- Fiber optic cable assemblies
- Testing laboratories
- Industrial applications
- Scientific equipment
- Medical applications
